U.S. Patent and Trademark Office PTOL-326 (Rev. 08-06) Application/Control Number: 10/566,491

Art Unit: 3748

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 8-12, 28-35, are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2001-355453 (Takemoto).

Takemoto discloses a turbocharger having a compressor 14 with recirculation line 32 having a control valve 33 for returning cooling fluid to the compressor to prevent surge, the cooling device is filter 12, and the mixing device 34.

Claims 1-4, 8-11, 28-29, 31-35, are rejected under 35 U.S.C. 102(b) as being anticipated by GB 2163483 (Senior).

Senior discloses a turbocharger having a compressor 14 with recirculation line 23 having a control valve 25 for returning cooling fluid to the compressor to prevent surge, a cooling device.

Claims 1-4, 8-11, 28-29, 31-35, are rejected under 35 U.S.C. 102(b) as being anticipated by US 6324848 (Gladden et al).

Gladden et al discloses a turbocharger having a compressor 20 with recirculation line 48 having a control valve 60 for returning cooling fluid to the compressor to prevent surge, a cooling device.

Art Unit: 3748

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 6-7, 13-19, are rejected under 35 U.S.C. § 103(a) as being unpatentable over JP 2001-1355453 (Takemoto) in view of U.S. 6327980 (Chen et al). Takemoto discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose air cleaner used as mixer and at the inlet of the compressor. Chen et al is relied upon to disclose a turbocharger compressor 16 having many air cleaners 24, 26 at the inlet and in the inlet flow path. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide air cleaners (filters) at the inlet and in the mixer of Takemoto as taught by Chen et al for the purpose of more effectively cleaning the air intake.

Claims 20-27, 36, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3748

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Examiner Nguyen whose telephone number is (571) 272-4861. The examiner can normally be reached on Tuesday--Friday from 12:30 AM to 10:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas E. Denion can be reached on 571-272-4859. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
